

How does novel coronavirus spread?

- Through the air by coughing and sneezing;
- close personal contact, such as touching or shaking hands;
- touching an object or surface with the virus on it, then touching your mouth, nose, or eyes;
- in rare cases, contact with feces.

Watch for symptoms: People who have been diagnosed with COVID-19 have reported a wide range of symptoms – ranging from mild symptoms to severe illness that may appear in as few as 2 days or as long as 14 days after exposure to the virus.
